

Ref: California Proposition 65 applicability to Vulcan products

To Our Valued Customers:

The California Safe Drinking Water & Toxic Enforcement Act of 1986, commonly referred to as California Proposition 65 or simply Prop 65, requires some manufacturers to provide customers with notification about chemicals in the products they purchase. The Proposition 65 requirements were recently updated effective August 30, 2018.

Vulcan has evaluated Proposition 65's requirements and states that, to the best of our knowledge and with the exception of one particular leaded product discussed below, the products that Vulcan supplies are in compliance with Proposition 65, and reasonably anticipated use of these products is not expected to result in exposure to any Proposition 65 chemicals that would require a Proposition 65 warning.

Vulcan does manufacture a 12L14 Leaded cold drawn bar and it is our intention to supply a Proposition 65 warning for this product if it is purchased with the intention of being shipped to California.

A statement regarding the Proposition 65 regulations can also be found in Section 15 (Regulatory Information) of each product's SDS under State Regulations.

If you have any questions regarding products produced by Vulcan, please contact your sales representative. We certainly value your business.

*Vulcan Policy Update Effective Date **Sept 20**, 2018*
